

CASE STUDY

ACOUSTISORB® USED FOR WOOLWORTHS ROOFTOP ACOUSTIC ENCLOSURES

Background

Many supermarkets look to locate their air conditioning systems on the rooftop to conserve space. However, air conditioning units often lead to complaints from residents. The solution of a noise attenuation barrier had to be aesthetically pleasing, due to the supermarkets' locations in busy shopping centres encircled by suburban housing and infrastructure.

Solution

ModularWalls designed a solution that enabled an aesthetically pleasing and noise absorbing solution for multiple Woolworths rooftop air conditioning systems. Our high performing AcoustiSorb75 panels were easily situated and installed on the rooftop. The pre-finished panels meant there was no painting required following installation, and the surf mist colour achieved the design intentions. As the leading manufacturers of cost-effective acoustic and boundary walls, ModularWalls have designed wall systems that offer a solution for every challenge.

Industry leader in innovative and cost effective acoustic and boundary walls

- Proven acoustic performance
- Cost effective
- Durable, lightweight modular construction
- Quick and easy installation
- Suited to environmentally harsh and remote locations
