

CASE STUDY

TURNKEY SOLUTION FOR DRIVE THRU NOISE BARRIER AT KFC GLEN WAVERLY

Background

A new KFC store in Glen Waverly required a perimeter noise barrier shielding the neighbouring residents from its car park and drive thru activity, due to extended operating hours. ModularWalls, the industry leaders in assisting businesses with noise abatement treatments, delivered a turnkey solution with the highest level of quality and service.

Solution

The turnkey solution involved everything from concept drawings, detailed design and engineering, right through to installation. The process was highly cost-effective with minimal disruption to the operation of the restaurant. The finished noise barrier was a 3m VogueWall, utilising AcoustiMax75 panels, which achieved a noise reduction of almost 30dB. The barrier presented like an inherent extension of the KFC drive-thru, harmonising with branding values and the store's architectural design.

The proprietary AcoustiMax panel is a lightweight modular wall panel possessing outstanding acoustic properties and a smooth designer finish. It is the ideal choice for architects and developers seeking an effective noise barrier that is aesthetically versatile, as well as economical.

It has also been a popular choice for commercial noise barriers among hospitality and retail industry giants, including projects with KFC Blacktown, McDonald's Sandgate, McDonald's Moss Vale, McDonald's Orange, McDonald's Kellyville, Woolworths, ALDI, Coles, Dan Murphy's and Costco.

Industry leader in innovative and cost effective acoustic and boundary walls

- Proven acoustic performance
- Cost effective
- Durable, lightweight modular construction
- Quick and easy installation
- Suited to environmentally harsh and remote locations
