

## CASE STUDY

# VOGUEWALL® OFFERS DURABLE AND AFFORDABLE FENCING SOLUTION FOR COASTAL HOMES

## Background

For this stunning coastal home, a brand new VogueWall with aluminium posts delivered a durable, yet affordable, premium fencing solution. Idyllically situated along the Port Hacking River, the renovation of this waterfront area posed many site-specific challenges, including restricted site access and a highly corrosive environment. However, the VogueWall, an Australian Made product specifically designed to withstand the harsh climates of our beautifully fierce country, overcame each and every concern.

## Restricted site access

Like many waterfront homes, this homeowner faced unique challenges when it came to the delivery of materials and equipment. The only two options were to carry them by hand, or via barge, which came with incredibly high costs.

However, due to its lightweight, modular nature, the VogueWall was able to be carried, sparing the hefty price of barge delivery. The modular solution provided further savings by its manual installation with simple hand tools, negating the need for the transport of equipment or machinery. Lastly, its virtually waste-free installation process avoided the costs of waste removal.

## Corrosive coastal environments

By choosing our coastal-grade aluminium post option, the homeowner achieved greater rust resistance against the constant salt spray. Furthermore, even with a whopping 85% of Australians living coastally, many 'Aussie Proof' fences are actually not covered by warranty if situated within 1km from the coast. However, this was not a worry for this VogueWall; ModularWalls offer an extended 15-year warranty with your fence – no matter where you call home.

## Premium aesthetics

This home was a newly renovated treasure of modern architecture, with expansive views of the river and Royal National Park. Therefore, it was also of utmost importance to the homeowner that its premium aesthetic values were maintained.

The VogueWall effortlessly delivered a high-end appearance, framing both the home and its picturesque views. The custom panels were prefinished in aluminium skins, achieving a unique finish that gleam subtly against the calm, rippling river.

Industry leader in innovative and cost effective acoustic and boundary walls

- Proven acoustic performance
- Cost effective
- Durable, lightweight modular construction
- Quick and easy installation
- Suited to environmentally harsh and remote locations
